Connecting People with Health Information

A network of health science libraries serving
New England

<http://www.nnlm.nlm.nih.gov/ner>
1-800-338-7657

Mission

The mission of the **National Network of Libraries of Medicine, New England Region (NN/LM NER)** is to advance the progress of medicine and improve the public health by: providing all health and allied health professionals with equal access to biomedical information; promoting the integration of evidence based medicine into medical practice; and improving the public's awareness of and access the highest quality healthcare information to enable them to make informed medical decisions.

Goals

- Assess the health information needs of health professional, librarians and the public.
- Develop and implement relevant programs and strategies to improve awareness of and access to healthcare information.
- Promote new technologies to deliver the highest quality healthcare resources to the desk top and/or point of use.
- Foster collaboration and sharing resources in the region.
- Publicize the information services available from the National Library of Medicine.

The **National Library of Medicine**, the world's largest medical library on the **National Institutes of Health** campus, funds eight regional medical library programs nationwide. The University of Connecticut Health Center serves as the Regional Medical Library for a network of health science libraries and information centers in New England.

To learn more about us, call toll-free in New England at **1-800-338-7657** or visit us on the Internet at one of these sites:

NN/LM NER Services

Training

The **NER** collaborates with network members to provide free training opportunities for health-related organizations. Workshops for health professionals, librarians and consumer groups include teaching and demonstrating PubMed (MEDLINE), NLM Gateway, TOXNET, ClinicalTrials.gov, and MEDLINE *plus*. The National Library of Medicine website <http://www.nlm.nih.gov> is your gateway to these and other information resources.

Outreach

The **NER** funds collaborating partners through subcontracts to improve access to health information in rural, urban and underserved areas. In addition, funding for special populations is available from the **NER** and The National Library of Medicine Extramural Programs Division.

Resource Sharing Network

The **NER** coordinates a regional network of 350 health sciences libraries including major medical centers as well as community-based hospital libraries willing to provide interlibrary loans and document delivery services within the network.

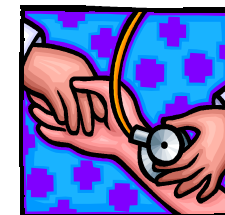

Reference and Information Services Referrals

Contact the **NER** for referrals to health science libraries in your area that provide training, reference and other information services or access this information directly on the Internet at <http://www.nnlm.nlm.nih.gov/members>.

Consumer Health Information

The **NER** cooperates with public libraries, health science libraries and consumer groups to promote access to the highest quality health information to enable patients, their families and the public to make informed health and healthcare decisions.

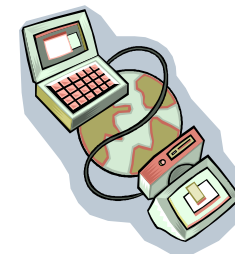

Publications

New England Sounding Line is a bimonthly newsletter of the **NER** which can be found at <http://www.nnlm.nlm.nih.gov/ner>. The newsletter includes updates on **NER** and National Library of Medicine initiatives and tips for searching the National Library of Medicine databases.

Network Development

The **NER** supports health sciences libraries in the network, promotes the development of consortia for resource sharing, and provides continuing education opportunities for health science librarians.

Technology Awareness

The **NER** monitors advances in information technology and promotes awareness of new technologies by partnering with health-related organizations to produce regional technology conferences.

Exhibits

The **NER** exhibits at national, regional and local healthcare meetings. Presentations and training are available at these events. Contact the **NER** if your organization is interested in having a **NER** librarian participate in your professional meeting.
